

FRANCIS JEANE

This plane was designed in Largo, Florida during hurricanes Francis and Jeane. It is a nice mid to high speed glider.

Note: Red lines are for folds, blue lines indicate existing creases, and green lines represent hidden edges.

Step 1
Fold paper in half long ways and crease. Unfold.

Step 2
Fold top corners down to meet at center.

Step 3
Fold Edge A down to meet Edge B. Crease well. Fold in half on centerline as shown. Crease and unfold both folds.

Step 4
Repeat step 3 for opposite edge.

Step 5
Grab Point 1 and Point 2 and fold them to the centerline. This will cause Point 3 to fold down and puff up. Flatten Point 3 to centerline as shown below.

Step 6
Flip plane over from right to left.

Step 7
Fold flap A up as shown. Flatten well.

Step 8
Flip plane over top to bottom.

Step 9
Fold Flap B to left on centerline.

Step 10
Fold Flap C down as shown.

Paper Airplane Flying Instructions
Make sure wings are level (or slightly up) and fins are straight up. Throw level at a "medium" or a "high" speed. Trim per general instructions. It may do better if nose and leading edges of wings are taped together.

Step 11
Return Flap B to right side.

Step 12
Repeat steps 9-11 for left side.

Step 13
Flip plane over left to right.

Step 14
Fold plane in half.

Step 15
Fold wings over 7/8" from centerline. Fold tail 2 3/8" from bottom edge as shown. Crease and unfold. Push tail up into center of body.

Step 16
Fold fins up 1 1/16" from edge.

Have Fun
