# Street Cruiser

One of my favorite fast gliders.
Note: Red lines are for folds, blue lines indicate existing creases, and green lines represent hidden edges.
Step 1

Fold paper in half long ways and crease.

Step 2

Fold top corner down to meet at left edge. Turn paper over left to right.

Step 3

Fold top corner down to meet at right edge. Unfold with flaps to the back.

Step 4

Fold Point 1 down to meet Point 2 as shown. Crease and unfold.

Step 5

Fold Point 1 down to meet Point 3 as shown. Crease and unfold.

Step 6

Fold top flap down to centerline along Line A as shown.

Step 7

Grab Point 4 and fold to Point 5 along centerline. This will stretch Point 6 to centerline along Crease A.

Step 8

Repeat for right side by grabbing Point 7 and folding back to left along centerline.

Step 9

Return Flap A to right side.

Paper Airplane Flying Instructions

Make sure wings are level (or slightly up) and winglets are vertical. Throw level at a "medium" or "fast" speed. Trim per general instructions if required but the plane seems to do well "as folded" on a variety of paper. It may do better if nose and leading edges of wings are taped together.
