

Hand Toss 6

Instructions:

1. Cut out and lay pieces as shown. Starting with center (CB0) use a glue stick to glue body section together (LB1&2 and RB1&2).
2. Using a can or other cylindrical item add some initial curve to the wing by rubbing flat wing along the curve of the can.
3. After Body dries glue nose pieces on (LN2-5, RN2-5). Glue winglets to wing and vertical stabilizer to tail level and square.
4. Flatten wing tabs with pencil or similar item and glue wing in place. Glue wing and tail assemblies in place. This type of airplane is referred to as a low wing airplane.
5. Before Body/Wing assembly completely dries use gauge to set dihedral angle for wings as shown:

Note: Quick instructions only see full instructions here.
